ACM SIGPLAN

A Monthly Publication of the Special Interest Group on Programming Languages

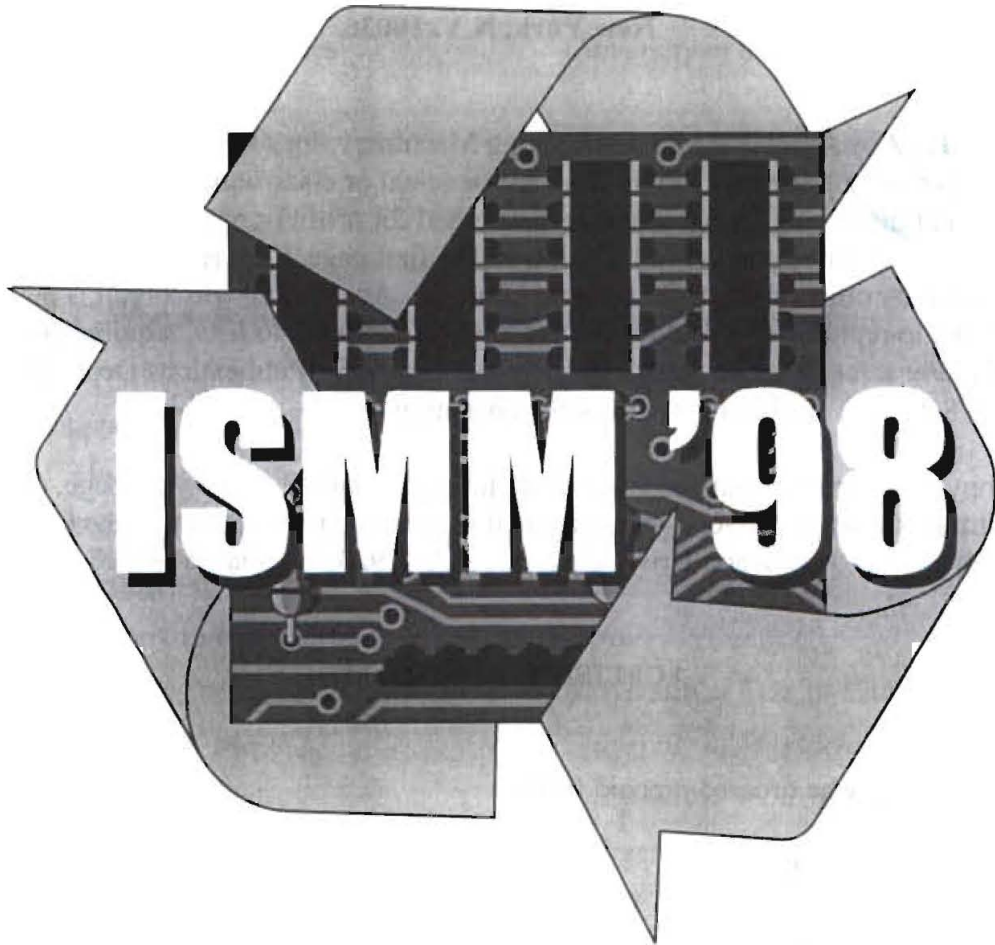

notices

ACM SIGPLAN International Symposium
on Memory Management (ISMM '98)

CONFERENCE
PROCEEDINGS

INTERNATIONAL SYMPOSIUM ON MEMORY MANAGEMENT

Vancouver, British Columbia, Canada
17-19 October, 1998

Sponsored by the
ACM Special Interest Group on Programming Languages (SIGPLAN)

Table of Contents

<i>A Compacting Incremental Collector and its Performance in a Production Quality Compiler</i>	1
Martin Larose and Marc Feeley (Université de Montréal)	
<i>Combining Card Marking with Remembered Sets: How to Save Scanning Time</i>	10
Alain Azagury, Eliot Kolodner, Erez Petrank and Zvi Yehudai (IBM Haifa Research Laboratory)	
<i>Barrier techniques for Incremental Tracing</i>	20
Pekka P. Pirinen (Harlequin)	
<i>The Memory Fragmentation Problem: Solved?</i>	26
Mark S. Johnstone and Paul R. Wilson (Motorola Somerset Design Center and University of Texas at Austin)	
<i>Using Generational Garbage Collection to Implement Cache-Conscious Data Placement</i>	37
Trishul M. Chilimbi and James R. Larus (University of Wisconsin-Madison)	
<i>One-bit Counts between Unique and Sticky</i>	49
David J. Roth and David S. Wise (Indiana University)	
<i>Hierarchical Distributed Reference Counting</i>	57
Luc Moreau (University of Southampton)	
<i>Comparing Mostly-Copying and Mark-Sweep Conservative Collection</i>	68
Frederick Smith and Greg Morrisett (Cornell University)	
<i>A Non-Fragmenting, Non-Moving, Garbage Collector</i>	79
Gustavo Rodriguez-Rivera, Michael Spertus and Charles Fiterman (Geodesic Systems)	
<i>Garbage Collection in Generic Libraries</i>	86
Gor V. Nishanov and Sibylle Schupp (Rensselaer Polytechnic Institute)	
<i>Memory Management for Prolog with Tabling</i>	97
Bart Demoen and Konstantinos Sagonas (Katholieke Universiteit Leuven)	
<i>The Bits Between the Lambdas — Binary Data in a Lazy Functional Language</i>	107
Malcolm Wallace and Colin Runciman (University of York)	
<i>A Memory-Efficient Real-Time Non-Copying Garbage Collector</i>	118
Tian F. Lim, Przemysław Pardyak and Brian N. Bershad (University of Washington)	
<i>Guaranteeing Non-Disruptiveness and Real-Time Deadlines in an Incremental Garbage Collector</i>	130
Fridtjof Siebert, (Open Group Research Institute)	
<i>A Study of Large Object Spaces</i>	138
Michael W. Hicks, Luke Hornof, Jonathan T. Moore and Scott M. Nettles (University of Pennsylvania)	
<i>Portable Run-Time Type Description for Conventional Compilers</i>	146
Sheetal V. Kakkad, Mark S. Johnstone and Paul R. Wilson (University of Texas at Austin and Motorola Somerset Design Center)	
<i>Compiler Support to Customize the Mark and Sweep Algorithm</i>	154
Dominique Colnet, Philippe Coucaud and Olivier Zendra (INRIA-CNRS-Université Henri Poincaré)	
<i>Very Concurrent Mark-&Sweep Garbage Collection without Fine-Grain Synchronization</i>	166
Lorenz Huelsbergen and Phil Winterbottom (Bell Laboratories)	
<i>Memory Allocation for Long-Running Server Applications</i>	176
Per-Åke Larson and Murali Krishnan (Microsoft)	
<i>Invited talk: A Brief Introduction to Regions</i>	186
Mads Tofte (UC Berkeley)
