# Contents

<b>Foreword</b>	<b>vii</b>
<b>Acknowledgments</b>	<b>ix</b>
<b>Introduction</b>	<b>xi</b>
<b>Part One: Overview</b>	<b>1</b>
<b>Chapter 1 Quick Start to EJB, JTS, and OTS</b>	<b>3</b>
Problem	3
Solution	4
Basic Concepts and Definitions	7
Transaction	7
Distributed Transaction	8
The Money Transfer Example	8
Distributed Transaction Processing Standards	9
Object Transaction Service	11
Overview	11
The Money Transfer Example with OTS/JTS	13
Integrating OTS with Databases and Legacy	
Transaction Systems	30
Distributed Transactions and Java	31
Enterprise JavaBeans	32
EJB Roles	32
EJB Design Patterns and Naming Conventions	34
The Money Transfer Example with EJB	35
<b>Chapter 2 Transaction Processing Basics</b>	<b>51</b>
What Is a Transaction?	52
Different Transaction Models	54
Flat Transaction	55
Chained Transactions	56
Nested Transactions	57

Two-Phase Commit Protocol	58
First Phase	59
Second Phase	59
TP Monitors	63
TP Monitor Architecture	63
Distributed Transaction Management Standards:	
X/Open, OSI, OMG	67
X/Open	68
OSI	71
OMG	71
Why Use a TP Monitor Instead of a Database Server?	72
Transaction Servers	74
Object Transaction Monitors	76
<b>Part Two: OTS and JTS</b>	<b>77</b>
<b>Chapter 3 Understanding the CORBA Object Transaction Service</b>	<b>79</b>
What Does OTS Offer?	80
Components of an OTS System	81
Basic Concepts	85
Transaction Termination	85
Checked and Unchecked Behavior	85
Synchronization	86
Heuristic Completion	86
Transaction Service Architecture	87
Data Types, Structures, and Exceptions	88
Transaction Service Interfaces	92
Current Interface	93
TransactionFactory Interface	97
Control Interface	99
Terminator Interface	99
Coordinator Interface	101
RecoveryCoordinator Interface	105
Resource Interface	105
Synchronization Interface	107
SubtransactionAwareResource Interface	110
TransactionalObject Interface	112
Application Programming Models	112
Interpositioning	116
Failure Protocol	118
Transaction Integrity	120
Portability Issues	121
Interoperability with Existing Transaction Managers	122
Importing a Transaction from an X/Open Domain	123
Exporting a Transaction to the X/Open Domain	124

	Coexistence with Other TP Standards	125
	X/Open TX Interface Mappings	125
	X/Open XA Interface Mappings	125
	Support for Other Transaction Protocols	127
	Support for ODMG Standard	127
	IDL Reference	127
<b>Chapter 4</b>	<b>Programming with OTS</b>	<b>133</b>
	Application Requirements	134
	Application Architecture and Design Patterns	134
	Transactions	135
	Security	137
	Management	140
	Interface Specification	145
	Design and Implementation	160
	Flight Query	162
	Airline	174
	Travel Agent	187
	Directory Object	212
	Client	213
	Running the Application	222
	Configuring and Starting Databases	223
	Configuring and Starting OTS/ORB System	224
	Starting Services and Tools	225
	Start Application Servers and Clients	226
	Configuration Alternatives	228
	Different Types of Clients	228
	Configuration of Server-Side Objects	230
<b>Part Three:</b>	<b>EJB</b>	<b>233</b>
<b>Chapter 5</b>	<b>Understanding Enterprise JavaBeans</b>	<b>235</b>
	Why Enterprise JavaBeans?	236
	EJB Infrastructure	239
	Container	240
	Identifying an Enterprise Bean	242
	Container Implementation	243
	EJB Development	246
	Remote Interface	247
	Home Interface	248
	Bean Implementation	252
	EJB Deployment	267
	Transaction Policies	268
	Access Control	269
	Naming	270
	Typing	270
	Container-Managed Persistence	270

	Application Assembling	270
	Locating the Home Interface	271
	Obtaining the Remote Interface	272
	Invoking Methods	273
	CORBA and Enterprise JavaBeans	273
	Mapping for Distribution	274
	Mapping for Naming	275
	Mapping for Transaction	277
	Mapping for Security	278
<b>Chapter 6</b>	<b>Programming with EJB</b>	<b>279</b>
	Application Architecture	280
	Providing the Enterprise Beans	281
	Java Classes for Data Types	281
	Travel Agent	286
	Booking Entity	294
	Booking Business Object	307
	Flight Query	316
	Iterators with EJB	325
	Airline	328
	Uuid	334
	Assembling the Application	337
	Server-Side Composition	337
	Client Types	337
	Client Implementation	337
	Deploying the Enterprise Beans	342
	Transaction Policies	342
	Access Control Policies	343
	Naming	344
	Deployment Properties for Container-Managed Persistence	344
	Miscellaneous Deployment Properties	345
	Deployment Properties for Portability	345
	Administration of Enterprise JavaBeans	345
	Configuration Alternatives	345
<b>Index</b>		<b>347</b>
