Proceedings of the Sixteenth International Conference on
**Architectural Support for Programming
Languages and Operating Systems (ASPLOS XVI)**

Association for
Computing Machinery

Advancing Computing as a Science & Profession

ASPLOS XVI

Sixteenth International Conference on Architectural Support for Programming Languages and Operating Systems

March 5–11, 2011

Newport Beach, CA, USA

Sponsored by:

SIGARCH

SIGPLAN

SIGOPS

Association for
Computing Machinery

With Support from:

NSF, Google, VMware, Intel, Hewlett-Packard, Qualcomm,
Sun Oracle, AMD, Microsoft Research, and IBM

Table of Contents

ASPLOS 2011 Organization	ix
---------------------------------------	----

ASPLOS 2011 Sponsors & Supporters	xii
--	-----

Keynote

• The Cloud Will Change Everything	1
James R. Larus (<i>Microsoft Research</i>)	

Session 1: Better Logging Support for Software Debugging

Session Chair: Michael Swift (*University of Wisconsin-Madison*)

• Improving Software Diagnosability via Log Enhancement	3
Ding Yuan (<i>University of Illinois at Urbana-Champaign & University of California, San Diego</i>), Jing Zheng, Soyeon Park, Yuanyuan Zhou, Stefan Savage (<i>University of California San Diego</i>)	
• DoublePlay: Parallelizing Sequential Logging and Replay	15
Kaushik Veeraraghavan, Dongyoon Lee, Benjamin Wester, Jessica Ouyang, Peter M. Chen, Jason Flinn, Satish Narayanasamy (<i>University of Michigan</i>)	

Session 2: Understanding and Improving Transactional Memory

Session Chair: Michael Swift (*University of Wisconsin-Madison*),

• Hardware Acceleration of Transactional Memory on Commodity Systems	27
Jared Casper, Tayo Oguntebi, Sungpack Hong, Nathan G. Bronson, Christos Kozyrakis, Kunle Olukotun (<i>Stanford University</i>)	
• Hybrid NOrec: A Case Study in the Effectiveness of Best Effort Hardware Transactional Memory	39
Luke Dalessandro (<i>University of Rochester</i>), François Carouge, Sean White (<i>Lehigh University</i>), Yossi Lev, Mark Moir (<i>Oracle Laboratories</i>), Michael L. Scott (<i>University of Rochester</i>), Michael F. Spear (<i>Lehigh University</i>)	

Session 3: Innovations in Memory Ordering Models for Parallel Machines

Session Chair: James Laudon (*Google*)

• Efficient Processor Support for DRFx, a Memory Model with Exceptions	53
Abhayendra Singh (<i>University of Michigan</i>), Daniel Marino (<i>University of California, Los Angeles</i>), Satish Narayanasamy (<i>University of Michigan</i>), Todd Millstein (<i>University of California, Los Angeles</i>), Madanlal Musuvathi (<i>Microsoft Research</i>)	
• RCDC: A Relaxed Consistency Deterministic Computer	67
Joseph Devietti, Jacob Nelson, Tom Bergan, Luis Ceze, Dan Grossman (<i>University of Washington</i>)	
• Specifying and Checking Semantic Atomicity for Multithreaded Programs	79
Jacob Burnim, George Necula, Koushik Sen (<i>University of California, Berkeley</i>)	

Session 4: Programming for Persistent Memory

Session Chair: Thomas F. Wenisch (*University of Michigan*)

• Mnemosyne: Lightweight Persistent Memory	91
Haris Volos (<i>University of Wisconsin - Madison</i>), Andres Jaan Tack (<i>Skype Limited</i>), Michael M. Swift (<i>University of Wisconsin - Madison</i>)	
• NV-Heaps: Making Persistent Objects Fast and Safe with Next-Generation, Non-Volatile Memories	105
Joel Coburn, Adrian M. Caulfield, Ameen Akel, Laura M. Grupp, Rajesh K. Gupta, Ranjit Jhala, Steven Swanson (<i>University of California, San Diego</i>)	

Session 5: Enhancing Device Driver Reliability

Session Chair: Yuanyuan Zhou (*University of California, San Diego*)

- **A Declarative Language Approach to Device Configuration** 119
Adrian Schüpbach, Andrew Baumann, Timothy Roscoe, Simon Peter (*ETH Zurich*)
- **Improved Device Driver Reliability Through Hardware Verification Reuse** 133
Leonid Ryzhyk (*NICTA and The University of New South Wales*), John Keys (*Intel Corporation*),
Balachandra Mirla (*NICTA and The University of New South Wales*),
Arun Raghunath, Mona Vij (*Intel Corporation*),
Gernot Heiser (*NICTA and The University of New South Wales*)

Session 6: Ideas and Perspectives Session

Session Chair: Ras Bodik (*University of California, Berkeley*)

Session 7: Novel Computing Platforms

Session Chair: Luis Ceze (*University of Washington*)

- **A Case for Neuromorphic ISAs** 145
Atif Hashmi, Andrew Nere, James Jamal Thomas, Mikko Lipasti (*University of Wisconsin-Madison*)
- **Mementos: System Support for Long-Running Computation on RFID-Scale Devices** 159
Benjamin Ransford (*University of Massachusetts, Amherst*),
Jacob Sorber (*Dartmouth College*),
Kevin Fu (*University of Massachusetts, Amherst*)
- **Pocket Cloudlets** 171
Emmanouil Koukoumidis (*Princeton University*),
Dimitrios Lymberopoulos, Karin Strauss, Jie Liu, Doug Burger (*Microsoft Research*)

Session 8: Saving Power and Energy

Session Chair: Jim Larus (*Microsoft Research*)

- **Blink: Managing Server Clusters on Intermittent Power** 185
Navin Sharma, Sean Barker, David Irwin, Prashant Shenoy (*University of Massachusetts, Amherst*)
- **Dynamic Knobs for Responsive Power-Aware Computing** 199
Henry Hoffmann, Stelios Sidiroglou, Michael Carbin, Sasa Misailovic, Anant Agarwal, Martin Rinard
(*Massachusetts Institute of Technology*)
- **Flicker: Saving DRAM Refresh-power through Critical Data Partitioning** 213
Song Liu (*Northwestern University*), Karthik Pattabiraman (*University of British Columbia*),
Thomas Moscibroda, Benjamin G. Zorn (*Microsoft Research*)
- **MemScale: Active Low-Power Modes for Main Memory** 225
Qingyuan Deng (*Rutgers University*), David Meisner (*University of Michigan*),
Luiz Ramos (*Rutgers University*), Thomas F. Wenisch (*University of Michigan*),
Ricardo Bianchini (*Rutgers University*)

Session 9: Recognizing Software and Concurrency Bugs

Session Chair: Emery Berger (*University of Massachusetts, Amherst*)

- **2ndStrike: Toward Manifesting Hidden Concurrency Typestate Bugs** 239
Qi Gao (*Facebook Inc.*), Wenbin Zhang, Zhezhe Chen, Mai Zheng, Feng Qin (*The Ohio State University*)
- **ConSeq: Detecting Concurrency Bugs Through Sequential Errors** 251
Wei Zhang, Junghee Lim, Ramya Olichandran, Joel Scherpelz, Guoliang Jin, Shan Lu, Thomas Reps
(*University of Wisconsin, Madison*)
- **S2E: A Platform for In-Vivo Multi-Path Analysis of Software Systems** 265
Vitaly Chipounov, Volodymyr Kuznetsov, George Candea
(*École Polytechnique Fédérale de Lausanne*)

Session 10: Rethinking and Protecting Operating Systems

Session Chair: Orran Krieger (*VMware*)

- **Ensuring Operating System Kernel Integrity with OSck** 279
Owen S. Hofmann, Alan M. Dunn, Sangman Kim (*The University of Texas at Austin*),
Indrajit Roy (*Hewlett-Packard Laboratories*), Emmett Witchel (*The University of Texas at Austin*)
- **Rethinking the Library OS from the Top Down** 291
Donald E. Porter (*Stony Brook University*), Silas Boyd-Wickizer (*Massachusetts Institute of Technology*),
Jon Howell, Reuben Olinsky, Galen C. Hunt (*Microsoft Research*)

Session 11: Learning from the Past: Drawing Conclusions from Extensive Measurement Studies

Session Chair: Orran Krieger (*VMware*)

- **Faults in Linux: Ten Years Later** 305
Nicolas Palix (*University of Copenhagen*), Gaël Thomas, Suman Saha, Christophe Calvès (*INRIA Regal/LIP6*),
Julia Lawall (*INRIA Regal/LIP6, University of Copenhagen*), Gilles Muller (*INRIA Regal/LIP6*)
- **Looking Back on the Language and Hardware Revolutions: Measured Power, Performance, and Scaling** 319
Hadi Esmaeilzadeh (*The University of Washington*),
Ting Cao, Yang Xi, Stephen M. Blackburn (*Australian National University*),
Kathryn S. McKinley (*The University of Texas, Austin*)

Session 12: New Compiler Optimizations

Session Chair: Scott Mahlke (*University of Michigan*)

- **Synthesizing Concurrent Schedulers for Irregular Algorithms** 333
Donald Nguyen, Keshav Pingali (*The University of Texas, Austin*)
- **Exploring Circuit Timing-Aware Language and Compilation** 345
Giang Hoang, Robert Bruce Findler, Russ Joseph (*Northwestern University*)
- **Orchestration by Approximation: Mapping Stream Programs onto Multicore Architectures** 357
Sardar M. Farhad (*The University of Sydney & NICTA*), Yousun Ko, Bernd Burgstaller (*Yonsei University*),
Bernhard Scholz (*The University of Sydney*)

Session 13: Exploiting Parallelism on GPUs

Session Chair: Kunle Olukuton (*Stanford University*)

- **On-the-Fly Elimination of Dynamic Irregularities for GPU Computing** 369
Eddy Z. Zhang, Yunlian Jiang, Ziyu Guo, Kai Tian, Xipeng Shen (*The College of William and Mary*)
- **Sponge: Portable Stream Programming on Graphics Engines** 381
Amir H. Hormati, Mehrzad Samadi, Mark Who, Trevor Mudge, Scott Mahlke (*University of Michigan*)

Session 14: Novel Performance Improvements

Session Chair: Kunle Olukuton (*Stanford University*)

- **Inter-Core Prefetching for Multicore Processors Using Migrating Helper Threads** 393
Md Kamruzzaman, Steven Swanson, Dean M. Tullsen (*University of California, San Diego*)
- **Improving the Performance of Trace-Based Systems by False Loop Filtering** 405
Hiroshige Hayashizaki (*IBM Research, Tokyo*), Peng Wu (*IBM Research, Watson Research Center*),
Hiroshi Inoue (*IBM Research, Tokyo*), Mauricio J. Serrano (*IBM Research, Watson Research Center*),
Toshio Nakatani (*IBM Research, Tokyo*)
